DETAILED ACTION

Status of the Application

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/20/2008 has been entered.

Claim(s) 2, 4-5 have been cancelled. Claim(s) 20-33 have been added. Claim(s) 1, 3, 6-33 are pending. Claim(s) 1, 3, 7-19 have been amended. Claim(s) 1, 3, 6-33 are examined herein.

Applicant's amendments to the claims have necessitated a new restriction requirement.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3, 6-21, drawn to a method of treating diseases of the skin and mucous membrane caused by herpes simplex virae comprising administration to the area to be treated an alkali and/or alkaline earth salt of tosylchloramide .

Art Unit: 1617

Group II, claim(s) 22-33, drawn to a medicament comprising a salt of tosylchloramide selected from the group of alkali salts, alkaline earth salts and mixtures thereof.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I-II lack unity because the shared common technical feature is not a contribution over the prior art. Since it is well known in the art, it cannot be considered a special technical feature. In the instant case, the shared common technical feature is tosylchloramide salts.

Unity of invention links the various inventions together by sharing a common special technical feature in each invention. However, when the special technical feature is not a contribution over the prior art, the various inventions may be restricted from each other. In the instant case, unity of invention does not exist because the shared common technical feature is disclosed in US Patent 3,317,540; WO 91/07876; and DE 41 37 544 A1. Therefore, restriction between the composition and method claims is proper. See MPEP 1850 and 37 CFR 1.475.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1617

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call to the attorney is not required where: 1) the restriction requirement is complex; 2) the application is being prosecuted pro se; or 3) the examiner knows from past experience that a telephone election will not be made (MPEP § 812.01). Therefore, since this restriction requirement is considered complex, a call to the attorney for telephone election was not made.
